The best way to save your progress when you are building an order is to place your order on hold. This is for those scenarios when you may need to come back to your order at a later date.

To put an order on hold, simply build your cart (this can be done from a template, from product search, from a previous order or more). Head to your cart and click the "Hold Order".

Orders you've placed on hold

You can access orders you have put on hold through your dashboard under "Orders On Hold".

! **NB:** If you are sharing your user log in with a colleague, it is very important that you utilise the hold order functionality, as two carts cannot be built by the same user account at the same time.

Raise a Quote

To raise a quote on the SSS Australia website, all you need to do is create cart as you usually would. When you are happy with your cart, just “continue to check out”. On the next page, you need to input or confirm your shipping information and add any comments to the order. When you have completed this, instead of clicking “continue to place order”, instead click the yellow “submit cart for quote” button.

Custom Catalogues

Custom catalogues are a brand new feature for SSS Australia customers who have large fixed priced agreements or contracted lists, and are available to all SSS Australia customers who want to use this functionality. This functionality allows you to refine these larger lists by category and brand, making it much easier to browse.

Customers utilising custom catalogues will be able to switch between the full SSS Australia catalogue and their custom catalogue with an easy drop down.

Instead of seeing the full SSS Australia catalogue, when in custom catalogue mode, only custom catalogue products will be visible.

Items that are on the contract template will be identified, and you can choose to only display them.

The screenshot displays the SSS Australia website interface. At the top, a navigation bar includes 'Catalogue' and 'Contract Only' tabs. Below this, the main navigation menu lists categories like 'Home', 'Contract Products', 'Specials', 'General Healthcare', 'Aged Care', 'Hospital', 'Services', 'News & Resources', and 'About Us'. The 'Contract Products' page is active, showing a search bar and a filter section with 'Display Contract Items' and 'Display Non Contract Items' buttons. A grid of products is displayed, each with a 'CONTRACT' label. An inset window shows the 'Order Templates' dashboard, which includes a search bar and a table of contract items.

At the top right of the cart, a blue button labeled "Create Standing Order" is highlighted with a dashed arrow pointing from the cart title.
